S U M M A R Y

I'm a technically sophisticated professional offering more than 15 years of development, design, content editing and web application programming experience. Progressed in career from Web Developer to Web Development Lead to Development Manager roles. I possess a wealth of technical knowledge and a proven ability to provide leadership and strategic vision for my team. I'm experience in full Web development life cycle including Web 2.0 & Section 508 and W3C Compliance experience. As lead developer I work with the designers on concept development and the development and implementation of all front-end user experiences and interface. I work closely with other members of the creative department to develop websites, email templates, online ads, direct mail pieces, and event branding. I have strong leadership skills with a successful development track record of delivering large-scale, mission-critical projects on time and under budget.

A R E A S O F E X P E R T I S E

PROFESSIONAL EXPERIENCE

Squareknot

Feb 2014-Present

Interactive Development Manager

My responsibility at Squareknot have we working as both a manager, responsible for work assignment as well as estimate of project effort, and duration and as Front end developer responsible for working for the development of frontend user experiences and interface.

- Worked closely with business groups to gather requirements.
- Developed prototypes using HTML 5, CSS 3, AJAX, JAVASCRIPT, JQUERY and JSON to be used as a blueprint for content and technical development.
- Implemented UI layout of controls, content and navigation through the use of conceptual diagrams, wireframes and visual mockups.
- Cross Browser development for IE, Firefox, Safari, Chrome and Opera.
- Team building & management
- Work assignment

Technical environment: SQL, PHP

AIMIA

May 2010-Feb 2014

Senior Interactive Development Manager

My responsibility at AIMIA varies. I work both as a studio manager, responsible for work assignment as well as estimate of project cost, effort, and duration and as lead developer responsible for working for the development of all frontend user experiences and interface.

- Worked closely with business groups to gather requirements.
- Developed prototypes using HTML 5, CSS 3, AJAX, JAVASCRIPT, JQUERY and JSON to be used as a blueprint for content and technical development.
- Implemented UI layout of controls, content and navigation through the use of conceptual diagrams, wireframes, visual mockups, and rapid prototypes of key UI elements.
- Worked within rapid design and development cycles with changing priorities.
- Cross Browser development for IE, Firefox, Safari, Chrome and Opera.
- Team building & management
- Work assignment
- Estimate build costs

Technical environment: MS SQL, .Net
